Rejuvenation vs Replacement.

POWERED BY:

MHI ROOFING

#GAFMASTERELITE MEREDITH HOME IMPROVEMENTS

Protecting What Matters Most Since 1979.

There has to be a better option!

Our owners have been in the roofing industry nearly their entire lives and wanted to offer customers a better, more cost effective, alternative to prematurely replacing their roofs.

Ugly Roof wants to bring your roof back to life with our ROOF REJUVENATION PROCESS. We use the highest quality materials and state of the art techniques in everything we do. A roof rejuvenation can transform your home while extending its life significantly.

UglyRoof.Com was born.

Why UglyRoof?

We have mastered our rejuvenation process. We don't just Clean roofs or Repair Roofs or Spray oils on your roof. We REFRESH. REPAIR. and RESTORE. We do things that most roofing companies can not do - we add life to your existing shingle roof by restoring the oils back into the asphalt.

From Pittsburgh PA
to Fort Lauderdale FL!

The East Coast's Leading Roof Rejuvenation Company.

Does My Roof Qualify?

We do a thorough inspection, searching for ways to REFRESH, REPAIR and RESTORE your roof. Not all roofs qualify for our process and we will give you an honest evaluation and consultation on your best options.

We need 60% or more of the granules on your roof to qualify!

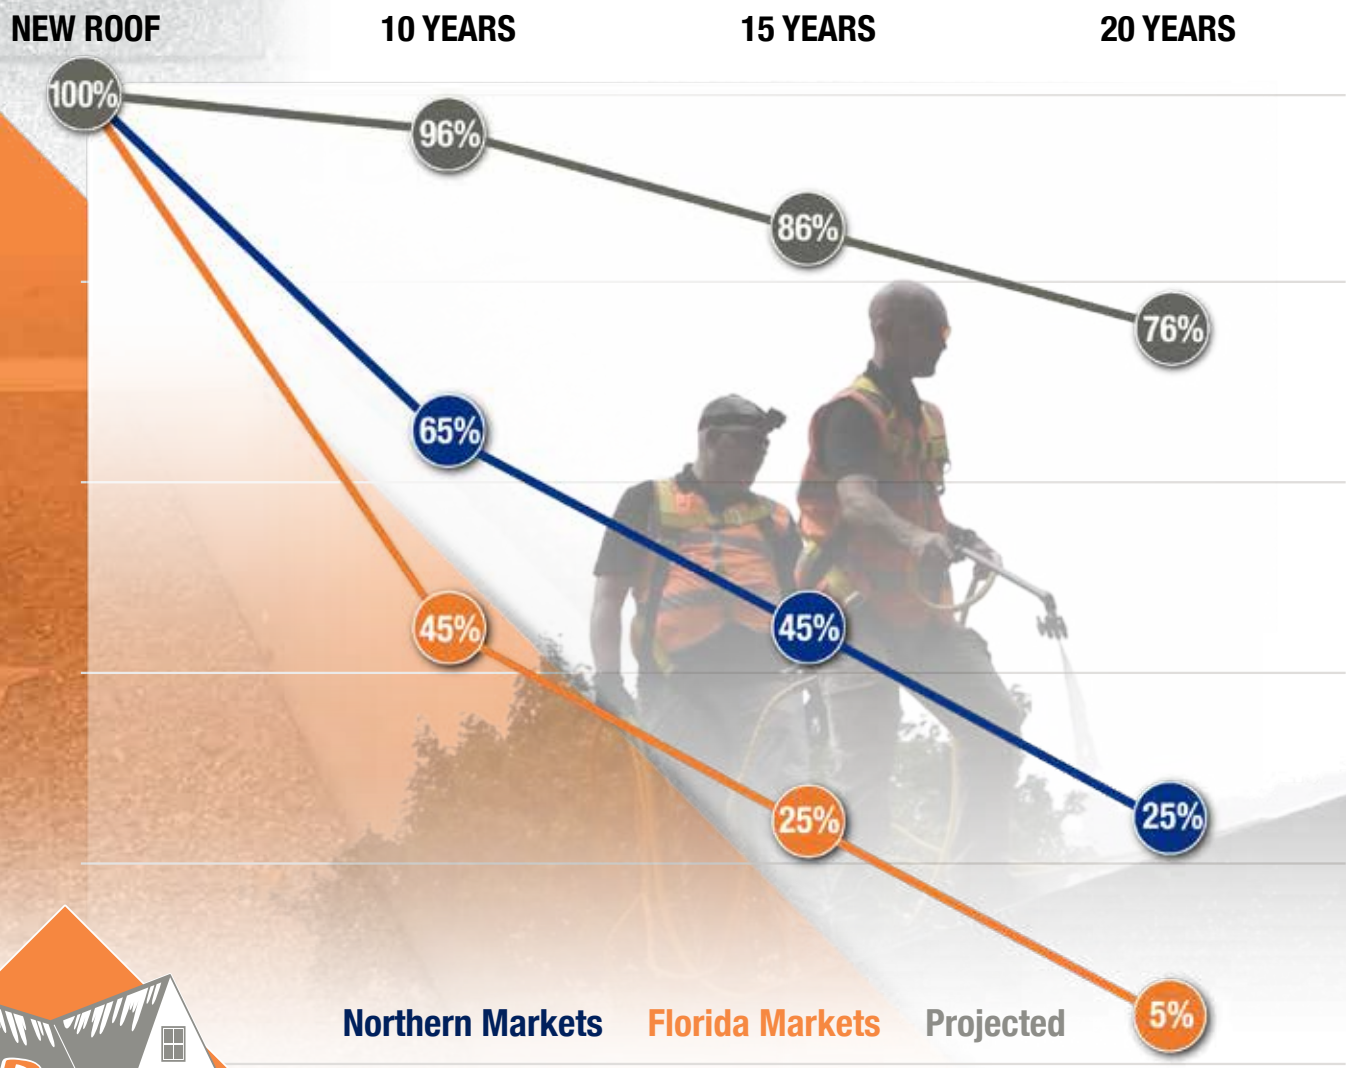
Why Granules Fail?

Granules start to fail after the asphalt core of the shingles begin to dry out. Also algae and moss growth will get under the granules and start to dislodge them, causing the roof to fail prematurely.

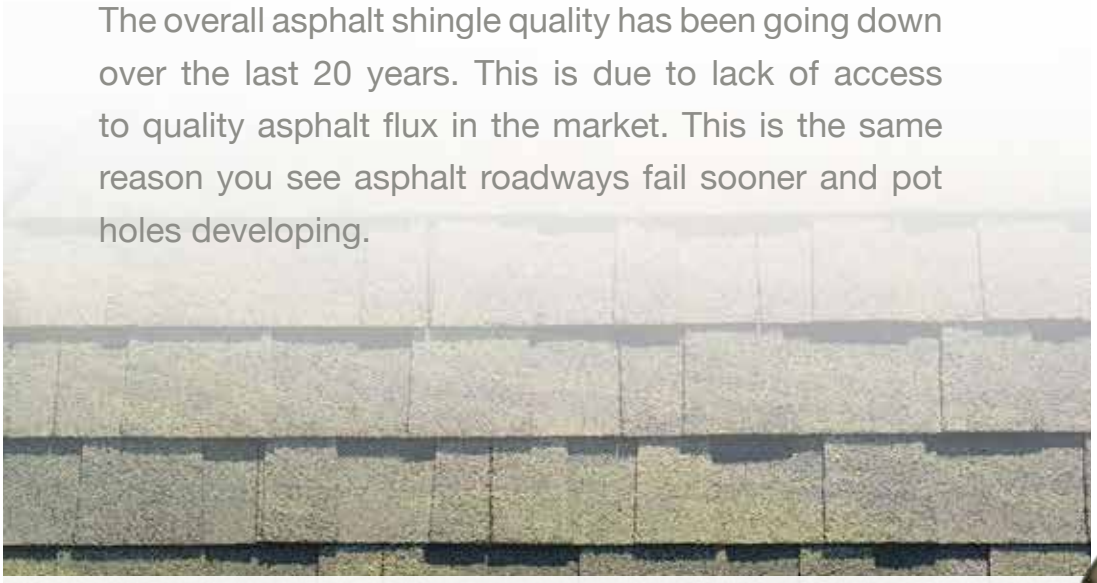
Asphalt Shingle Degradation Path

% Percentage of Asphalt Loss



Why Asphalt Fails?

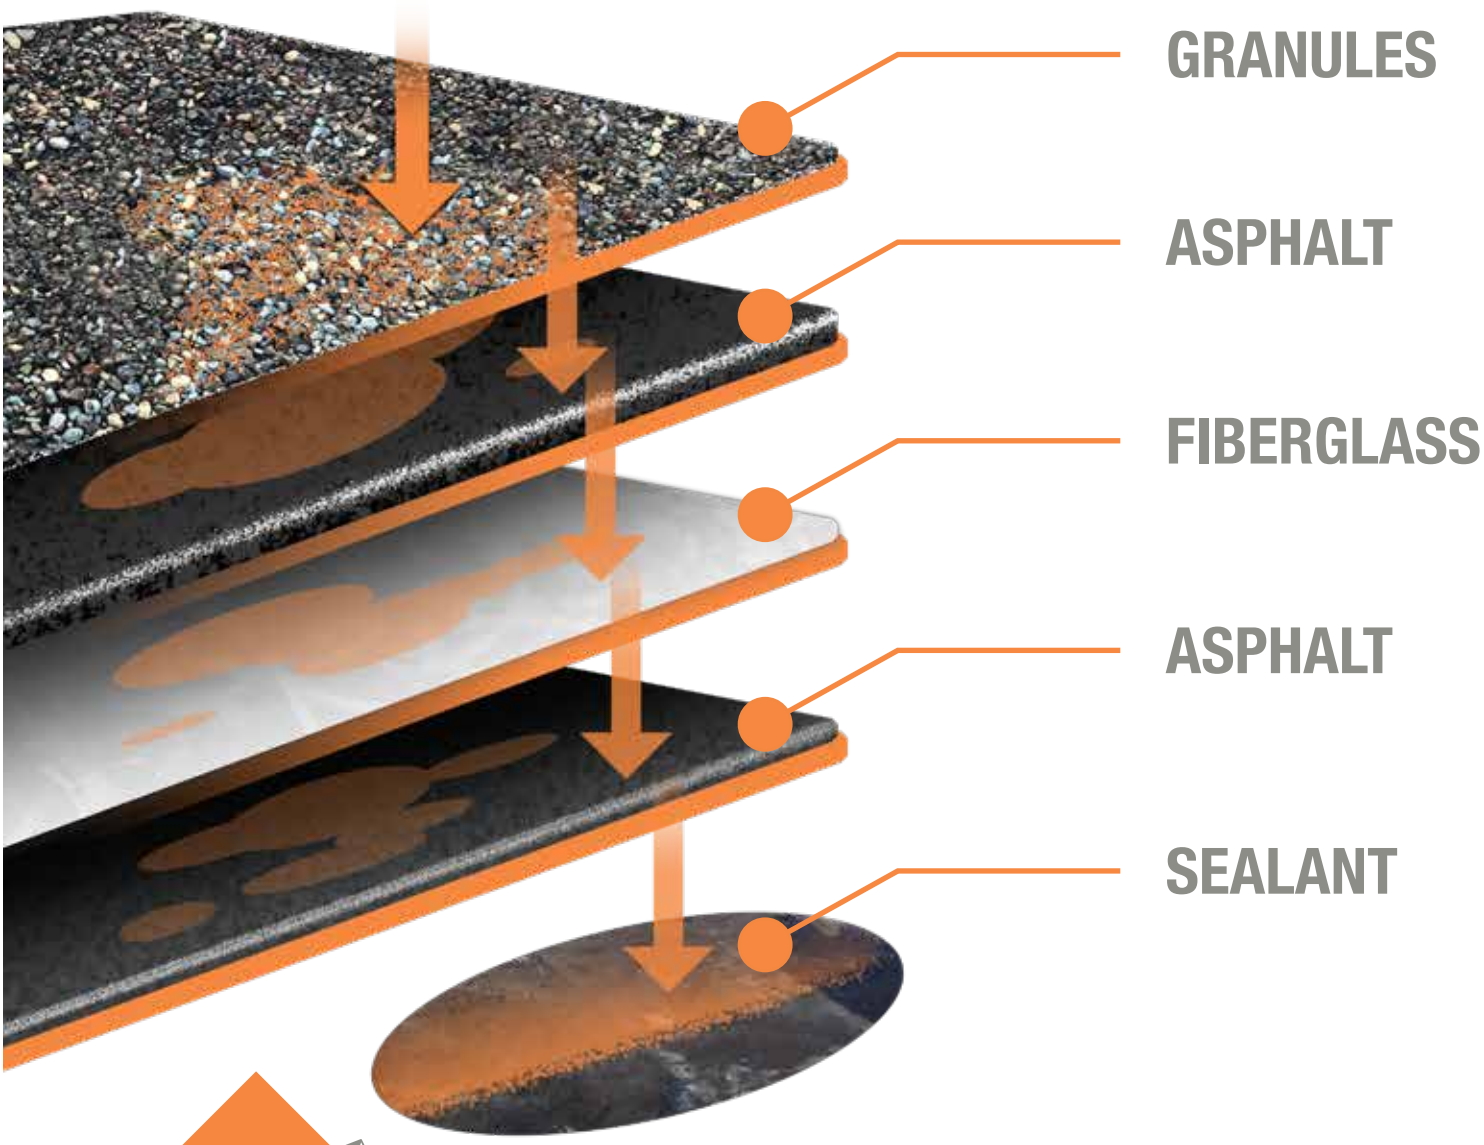
The overall asphalt shingle quality has been going down over the last 20 years. This is due to lack of access to quality asphalt flux in the market. This is the same reason you see asphalt roadways fail sooner and pot holes developing.



Poor Quality Asphalt Flux

How Does it Work?

Our **Proprietary Soy Based Oil** penetrates all the layers of the shingles, giving you a more flexible shingle ensuring a more reliable seal!



How Does it Work? *Continued*

Replacing Lost Oils

Natural agriculture oils have been used for the past 15 years to rejuvenate asphalt roads to replace the oils that are lost through years of aging.

Increased Granular Adhesion

By rejuvenating the shingles, there is 86% better granular adhesion (better bonding). Increased flexibility which helps prevent damage caused by wind and hail.

STOPS Moss Growth

When applied, Roof Rejuvenation will smother moss and algae, restricting the ability for moss to grow further. The dead moss will wash off after a good rain or roof cleaning.

GREENER SHINGLES INITIATIVE

Less Shingles in Landfills

Less Carbon Emissions

We can make a difference!

Our process saves millions of squares of shingles from going to the landfill prematurely. This also leads to less carbon emissions which has us all doing our part to do our GREEN INITIATIVE!

REJUVENATE

Our Rejuvenation Process

OUR REJUVENATION PROCESS:

1. REFRESH

Apply Pre-treatment Roof Cleaning

2. REPAIR

Roof Tune-Up

3. RESTORE

Apply Rejuvenation Oils to restore the shingles back to its original state

UglyRoof.com

TESTED. TRIED AND TRUE.

REJUVENATED LIKE NEW

1. **Shingle Flexibility**
   Improved From Fail to Pass
2. **Granular Adhesion**
   86% Improvement
3. **Hail Impact Resistance**
   Large Improvement
4. **Fire Resistance**
   40% Better Than Untreated Shingles

PRI Asphalt Technologies Tested our Rejuvenation Process and Concluded:

That we had successfully restored a 15 year + old shingle roof close to new roof conditions.

5YEAR EXTENDED WARRANTY

How it Works

1. UglyRoof Rejuvenation System is designed to keep the shingles soft and flexible, thus helping the shingles extend their life for a period of five years or more.
2. UglyRoof will not warranty leaks, damaged shingle from hail, wind damage and other premature aging problems.
3. Covered if: Shingles lose flexibility during their five-year period and there are signs of shingles rolling up.

Notes:

1. Remember it will take 2-6 weeks to see the cleaning results on most roof spray applications.
2. If there is heavy moss the process may take 1-3 months to see the final results.
3. We need access to your electric outlet and water spicket.
4. If project is ON-CALL Discount we can call anytime with 24 hours notice to apply formula.
